SHIPS TEST THEIR SPEED.

friendly test of skill which has just been

built. Upon one occasion she took 1,000 troops from Portsmouth to Mauritius in

consecutive voyages from Liverpool to Mel-bourne was eighty-three days, and only

the three China tes clippers in 1866 are too

familiar to need mentioning here, but the fact that a speed of over sixteen knots an

hour has been made by a sailing ship may not be so well known. The British clipper

ship Hurricane, during the course of one of her voyages nome from Melbourne, at-

her best run being 270 knots in sixteen and one-half hours. But it was after the six-ties, and indeed well on into the seventies,

tween England and China was that made in 1857, when the celebrated American clipper Pride of the Ocean did the run out from the Lizard to Hong Kong in sixty-

Savings Banks of Paris

Paris for 1900 has just been published. It

shows that at the end of that year the

number of deposits was 10,316,000, the

amount of deposits being 4,336,000,000

francs. In 1882 there were 4,645,000 depos-

itors, with deposits amounting to 1802 -

000,000 francs, and the increase has since

been uninterrupted. In 1882 123 Frenchmen out of every 1,000 were depositors. The proportion is now 267 per 1,000. Of the depositors 28 per cent are minors, 16 per cent artisans, 15 per cent owners of land or persons without a profession, 11 per cent day or agricultural laborers, and 10 per cent domestics.

Send for free maps and folder telling about our Guaranteed Accommodations. oculation, their dissemination being pre-vented by the action of the bile on the surrounding tissues. In other words, the im-munity is active, analogous to that conferred by vaccination against anthrax, and not passive, as is the immunity obtained by means of antitoxins against diphtheria

and tetanus.

Vincenci found that the bile of animals suffering from tetanus is able to antagonize a certain amount of tetanus toxin, while the bile from healthy animals is devoid of such property. That the bile has also the power of neutralizing certain poisonous alkaloids was shown by Arnold. This investigator injected a series of frogs with varying doses of strychnine, and recorded the onset of convulsions, the severity, duration and the time within which death occurred. Another series of frogs were injected with the same doses of strychnine mixed with fresh frogs' bile; a third with similar doses of strychnine mixed with xgall, and a fourth with bile slone. The frogs that had received the strychnine mixed with bile survived the doses of strychnine which were surely fatal when given alone. The symptoms appeared later,

note that the theory, so long maintained, that bile in the intestines exerts antiseptic properties is not supported by recent investigations. Albu and others have shown

Is a Dangerous For of Cattle, Sheet Lib Vincent, one of Wyoming's old-time cow-nunchers, and now riding on the Pow-

of his section are legion in number and as fearless as they are feroclous. These gray and greedy scourges of the Powder river stock areas do their raiding in bands ranging in numbers of from six to thirty, each band being organized and disciplined under the leadership of an old dog wolf especially chosen for his wariness, speed and endurance. To this captain these gaunt and grizzly marauders -a statement well evidenced from the fact that if one of these wolf leaders is slain or brated "Black Ball" liner, was not only the

crippled his band at once amalgamates with some other troop possessing a leader

of like capacity.

The age or size of their quarry is of little

objective opportunity of hamstringing the victim. Once hamstrung, it is all over with lusty steer or vigorous gelding as sad souvenirs of the raid of a gray wolf band.

The cattle herds are open and easy prey to the bold canine bandits, the cattle fleeties, and indeed well on into the seventies, when some of the best sailing records were made. And it is doubtful whether the performance of the Sir Lancelot, when she covered 14,000 miles in eighty-nine days against the prevailing monsoon, has ever been equaled; certainly there are no authentic statements to show that it has been surpassed. The voyage was made in 1869, from Foo-Chow-Foo to London, and her best day's run was 354 statute miles, while crossing the indian ocean, the average for individual attack easy and successful. The horses, however, with their superior intelligence, very frequently beat off the wolves by forming on the open ground an equine best day's run was 354 statute innes, while crossing the Indian ocean, the average for one week being 300 miles a day. This was only do these equine squares frequently beat off their assailants, but they some-times rout the wild dogs entirely, slaying them by striking, kicking and

herd has with it a stallion experienced in range life. He can smell a wolf further than he can see him, and at his shrill and warning neigh the herd rushes together and quickly forms the protecting square. The wolves fully appreciate this fact, and instances have been known of a gray band numbering scores of raiders trotting leisurely around one of these embattled equine squares and then seeking other and easier

pounds and boasts alike brain, brawn, a noiseless and tireless foot, a savage ferocity and an insatiable appetite. It is said of him that he can run longer and easier, eat oftener and more and display more cunsing and ferocity in a given length of time than any other known animal.

He is a prelife breeder eight or ten pure

Up to six months old the gray wolf pup is awkward and unwieldy, and it is a favorite cowboy pastime of the Powder river ranges to locate a gray wolf litter on the prairie and shoot the pups from horse-back as they skulkingly roll and tumble from their coverts in the grass and sage-brush. Crack shots with the pistol have been known to get a pup with every ballet from their six-shooters.

ing Its Supposed Properties. From American Medicine Among the means of protection possessed

by the organism against infectious diseases and toxic agencies, laboratory investigation has recently placed the bile; but, as is true of so many other facts in medicine, empiric knowledge anticipated scientific discovery. Thus, the natives of Africa, according to Fraser, have long known the value of serpents' bile as an antidote in the treatment of snake bites, and among the natives of Bengal it has been a custom, centuries old, to employ the liver of mad dogs as a protective agent against hydrophobia. In a letter to the Gazette Heb-"THE BRANDON," BLUE RIDGE MOUNTAINS-High elevation; NATURAL LITHIA WATER; well-equipped house, at Basic City, Va., on C and O. and N. and W. R.R. Mrs. BOLLING. domadaire de Medicin, a French traveler writes as follows:

BILE AS AN ANTITOXIN.

Some Recent Investigations Concern-

six or seven persons, among whom were two of my porters. I ordered bits of iron to be heated white-hot for cauterizing the to be heated white-hot for cauterizing the wounds, but the natives said to me, with a laugh, 'Oh, Sahib, that is nothing: we have an excellent remedy for hyprophobia; you shall see.' The mad dog approached again. One of the natives took a club and killed the animal. Another opened its body, took therefrom the palpitating liver, cut it into small bits, and gave them to the wounded man, who ate them raw. 'There is no more danger,' they said to me. As I remained incredulous, they brought me to a young man who bore large scars on his legs. He had been bitten five years before by a mad dog, but had eaten a raw plece by a mad dog, but had eaten a raw piece of the animal's liver, and had felt no ill-

These events took place in March, and it is now July 3. The wounds are cured and all the men continue to do well. Our ratives even assert that the remedy cure a man after he has been attacked by

parently has no protective or curative properties. The active anti-toxic principle of bile was found by Phisalix to be the taurocholate, and especially the glycocho-

Fraser's experiments show, only when it comes from the same species of animal as that injected with the toxin. Perhaps the most interesting observation connected with the antitoxic properties of bile are those made by Koch in his study of the rinderpest in South Africa. It was
